

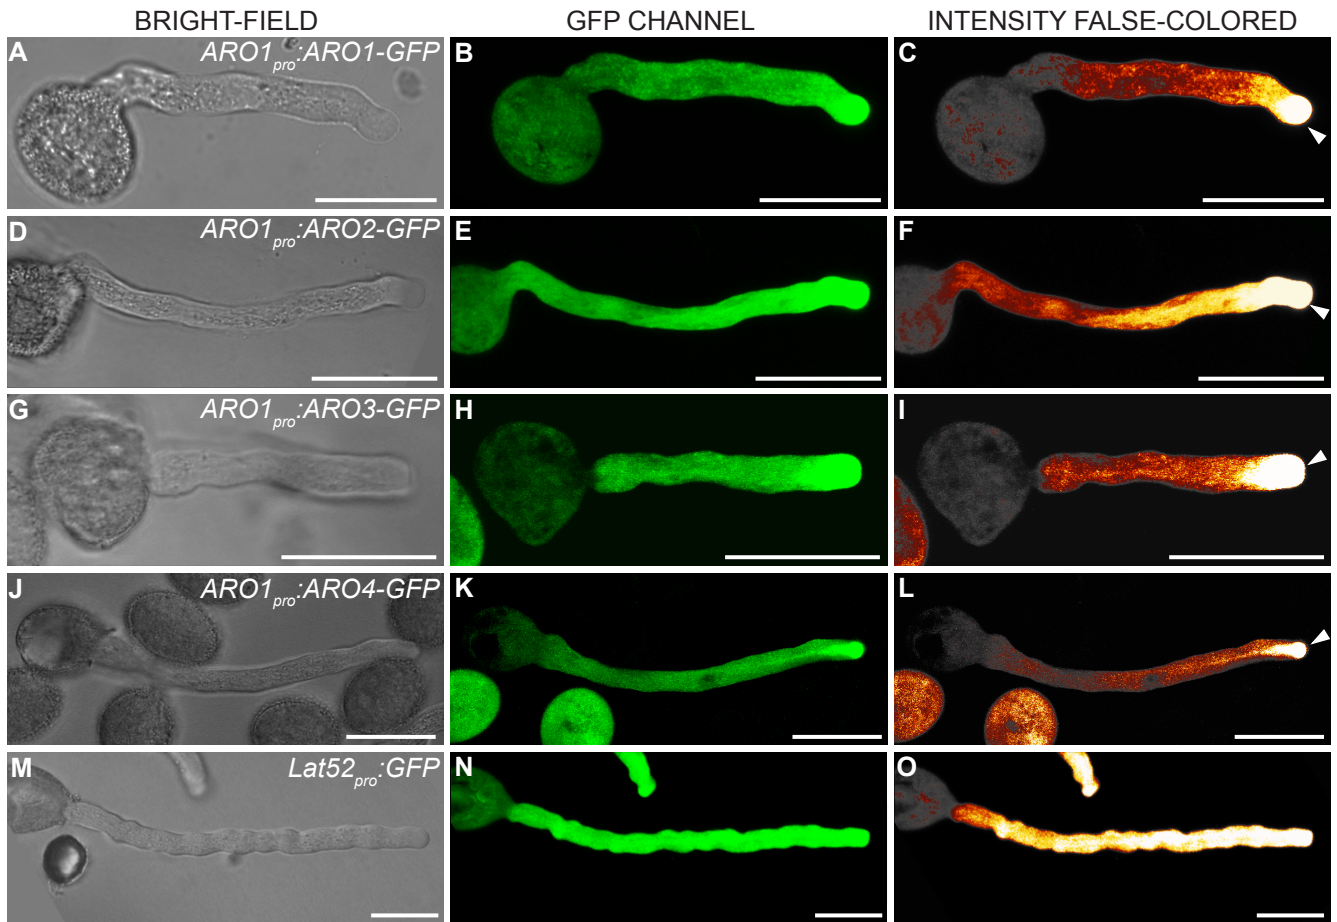

Figure S3.3 | Ectopically expressed ARO proteins are polar localized at the tips of growing pollen tubes.

(A) to (C) Polar localization of ARO1-GFP in pollen tubes under control of its endogenous promoter. **(D) to (F)** Polar localization of ectopically expressed ARO2-GFP in pollen tubes. **(G) to (I)** Polar localization of ectopically expressed ARO3-GFP in pollen tubes. **(J) to (L)** Polar localization of ectopically expressed ARO4-GFP in pollen tubes. **(M) to (O)** Unpolar localization of cytosolic GFP in pollen tubes. Arrowheads indicate polar accumulation of fusion proteins at the pollen tube tip. All images show single optical slices. Bars = 25 μm.
