

Supplemental References Chapter 6

- Amborella Genome Project.** The *Amborella* EC1-like1 protein sequence was identified by a tblastn search in the raw data set of the Amborella RNASeq Trinity Assembly (posted date: Jan 12, 2012), using EC1.1 as protein query. The sequence data were produced by the Amborella Genome Project (<http://www.amborella.org/>), in collaboration with the user community.
