

Study design of the LawSTRESS project

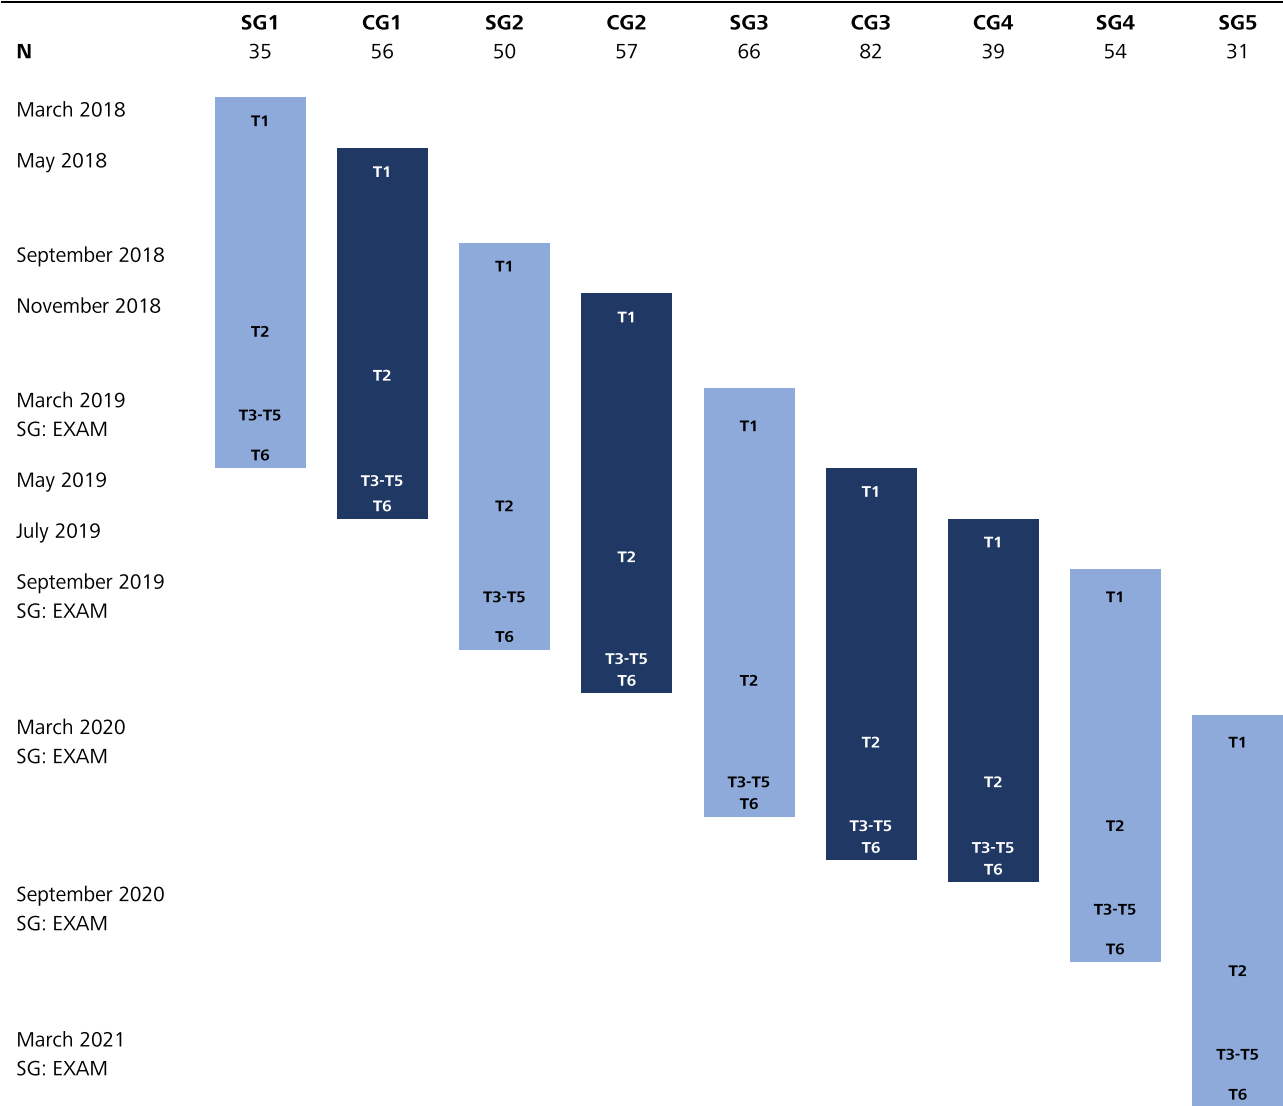

Figure 1. Timing of the data collection in the LawSTRESS project.

Note. Adapted from Giglberger et al. (2022).

Data collection lasted three years from March 2018 until April 2021. Adjusted to the dates of the state examination, the stress group (SG) started each March or September, with the last group initiated in March 2020. The control group (CG) participants started interleaved to the SG each May or November. An additional CG was assessed in July 2019 (Figure 2).

Figure 2. Nested data collection of the LawSTRESS project.

Note. SG: Stress group; CG: Control group; from Giglberger et al. (2022).
